

FinTech Industrial Project Planning Form

Student Name & ID: Wong Ko Yin (1155229658)

Project Title: Large Language Model Buildings for Bankwise Processes

Sponsoring Organisation: Bank of Communication

Industrial Supervisor: Mr. Nathan Wong, Mr. Edwin Chan

Instructions: This form is to specify the tasks the student plans to undertake for the FinTech Project at the beginning of a semester. Please clearly specify the nature of the task and the expected achievements up to the midterm and the final. Please complete the form using Microsoft Word and add rows if necessary.

Task	Expected achievements by the midterm	Expected achievements by the final
Compare the Performance of various open-source LLMs on Retrieval Augmented Generation (RAG)	Evaluate on different open source LLMs on RAG tasks based on Chinese proficiency, accuracy, processing time, robustness	Evaluate on fine-tuned LLMs on RAG tasks based on Chinese proficiency, accuracy, processing time, robustness
Improve LLM performance on RAG	Prompt Engineering: determine an appropriate prompt format for RAG Data cleaning: Remove unnecessary characters, headers, footers, and formatting issues for pdf	Use one or multiple method(s) below to improve LLM's performance on RAG: Self-Reflective RAG Corrective RAG Speculative RAG
Implement one or multiple prototype(s) for bankwise processes by leveraging RAG and LLM	Create the training set and test set from HKMA Supervisory Policy Manual to be used for fine tune the open source LLM	Fine-tune one or multiple open-source LLMs to improve their performance on RAG tasks using Chinese Language Develop the prototypes to demonstrate the ability of fine-tuned LLMs on Chinese RAG
